

# DKT A.Ş.

## BUSINESS SERVICES ABOUT WIND STATION INVESTMENTS

DKT Corporation is founded in Ankara in 1998. It has put its signature under many projects in Turkey and abroad.

Detailed informations about our projects, plans and applications of wind stations go as follows ;

- Erecting wind measurement towers for wind station projects ( 50 meter , 120 meter)
- Doing certain ground surveys to enable construction of steel tower – groundwork, concrete tower- groundwork and static measurements.
- Building interior and exterior roads for wind power stations.
- Certification of all construction work, concrete groundwork, concrete towers related to the wind stations with Tuv-Nord Certificate and production of concrete towers onsite upon request.
- Construction of transformer, measurement and control buildings at switch site. Montage of medium voltage tower bottom transformers and laying out the cables to switch site.
- Construction of switch sites and laying out of cables from switch sites to transformers and to other connection points.
- Rendering maintenance and technical services for all brands and models of wind stations, turbine winds and steels towers and their groundwork by a firm that we founded in Turkey with a German expert in abovementioned areas.

We may make an offer for all your projects related to our services indicated above.

In the near future, we will produce a hydrostatic drive Wind turbines of 150kW,300kW and 500kW under the name "Turkwind" with partnership of German Nordwind Corporation in our Turkey factory which will be completed soon.

Thank you for your concern.

Yours sincerely

**DKT A.S./TÜRK WIND**
